The Winter People

Rebekah L. Purdy

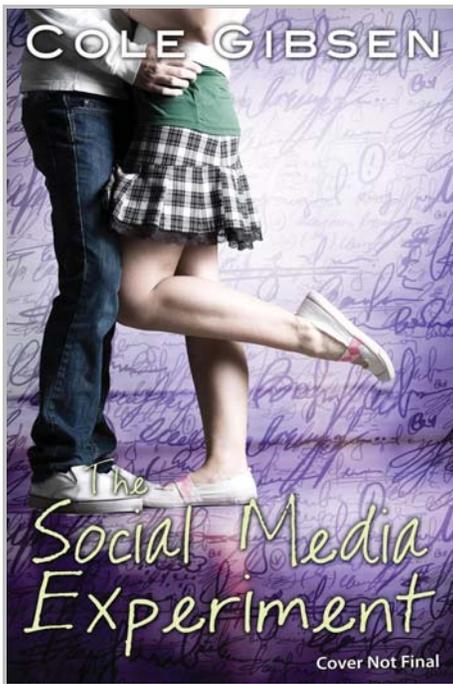

An engrossing, complex, romantic fantasy perfect for fans of Kristin Cashore or Maggie Stiefvater, set in a wholly unique world.

Salome Montgomery fears winter—the cold, the snow, the ice, but most of all, the frozen pond she fell through as a child. Haunted by the voices and images of the strange beings that pulled her to safety, she hasn't forgotten their warning to "stay away." For eleven years, she has avoided the winter woods, the pond, and the darkness that lurks nearby. But when failing health takes her grandparents to Arizona, she is left in charge of maintaining their estate. This includes the "special gifts" that must be left at the back of the property.

Salome discovers she's a key player in a world she's tried for years to avoid. At the center of this world is the strange and beautiful Nevin, who she finds trespassing on her family's property. Cursed with dark secrets and knowledge of the creatures in the woods, his interactions with Salome take her life in a new direction. A direction where she'll have to decide between her longtime crush Colton, who could cure her fear of winter. Or Nevin who, along with an appointed bodyguard, Gareth, protects her from the darkness that swirls in the snowy backdrop. An evil that, given the chance, will kill her.

Rebekah L. Purdy grew up in Michigan, where she spent many late nights armed with a good book and a flashlight. When not hiding at her computer and getting lost in her stories, she enjoys reading, singing, soccer, swimming, football, camping, playing video games, and hanging out with her kids. She may or may not have an obsession with anything chocolate. Rebekah currently resides in Michigan with her husband, kids, and a gazillion pets.

The Social Media Experiment

Cole Gibsen

In this whip-smart contemporary novel, one girl is about to find out there are consequences to wielding social media like a weapon.

On the surface, seventeen-year-old Reagan Fray appears to have everything. She's popular, Ivy League-bound, and her parents are rich enough to buy her whatever she wants. Behind the scenes, Reagan is a girl with an anxiety disorder struggling to hold the fraying threads of her life together. It takes work to stay on top, and when that fails, Reagan's learned from her politician mother that a little social espionage never hurts. That is, until the day Reagan finds all of her texts and private messages printed out and taped to every locker in her high school.

Finding herself ostracized from her friends and on the receiving end of the bullying she used to dish out, Reagan won't settle into her new role as social pariah without a fight. Determined to get back in with her friends and reclaim her social status before her mother finds out and sends her to boarding school, Reagan has no choice but to team up with outcast Nolan Letner.

But the closer Reagan gets to Nolan, the more she realizes all of her actions have consequences, and her future might be the biggest casualty of all.

Cole Gibsen first realized she was different when, in high school, she was still reading comic books while the other girls were reading fashion magazines.

It was her love of superheroes that first inspired her to pick up a pen. Her favorite things to write about are ordinary girls who find themselves in extraordinary situations.

Whatever Life Throws at You

Julie Cross

From the bestselling author of the Tempest trilogy, a compelling and romantic contemporary novel about falling in love with a star baseball player.

Seventeen-year-old track star Annie Lucas is too young to remember her dad's glory days as a Yankees pitcher. So when a family friend offers him a coaching position with the Kansas City Royals, Annie is intrigued by the idea of seeing the baseball side of her dad. Knowing that he'll be mentoring nineteen-year-old rookie phenom Jason Brody is just a bonus.

After an awkward first meeting with Brody involving a towel, very little clothing, and a much-too-personal locker room interview, Annie's convinced she knows his type—arrogant, bossy, and most likely *not* into high school girls. But as he and her father grow closer, Annie starts to see through his façade to the lonely boy in over his head beneath.

Falling for an up-and-coming superstar sucks. Except she's getting hints from Brody that maybe this crush isn't one-sided after all. When opening day comes around and her dad—and Brody's—job is on the line, she's reminded why he's off-limits. But Brody needs her, and staying away isn't an option.

Julie Cross is the international bestselling author of the Tempest series, a young adult science fiction trilogy. She's also the author of *Letters to Nowhere*, a mature young adult romance, as well as several forthcoming young adult and new adult novels.

Julie lives in Central Illinois with her husband and three children. She's a lover of books, devouring several novels a week, especially in the young adult and new adult genres. You can find her online at www.juliecrossbooks.com.

Love and Other Unknown Variables

Shannon Alexander

Faced with his girlfriend's cancer diagnosis, a teen bound for MIT must accept there's more to life than the quantitative and proven, and that the present holds more value than the future.

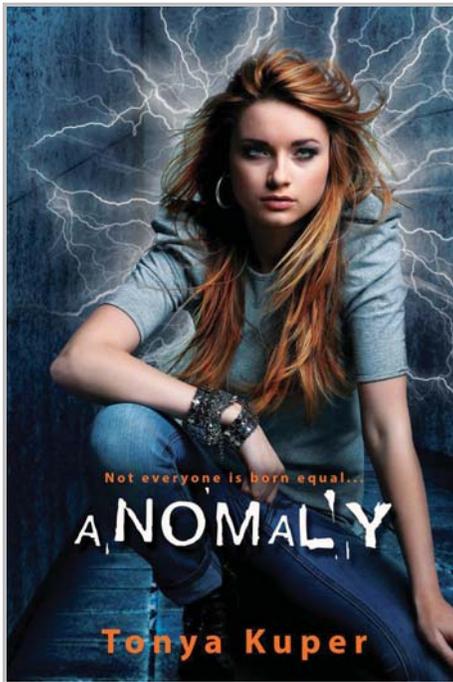

Charlie Hanson has a clear vision of his future. A senior at Brighton School of Mathematics and Science, he knows he'll graduate, go to MIT, and inevitably discover the solutions to the universe's greatest unanswerable problems. He's *that* smart. It's only a matter of time before there's a Nobel Prize in physics engraved with his name.

The future has never seemed very kind to Charlotte Finch, so she's counting on the present. She would rather sketch with charcoal pencils, hang out with her best friend, sing in her pitch-perfect voice, or read her favorite book than fill out a college application.

Charlie's future blurs the moment he reaches out to touch the infinity tattoo on Charlotte's neck. She's not impressed by the strange boy pawing at her until she learns he's a student at Brighton where her sister, Ms. Finch, has just taken a job as the English teacher.

At Charlotte's request, Charlie orchestrates the biggest prank campaign in Brighton history. But in doing so, he puts his own future in jeopardy. By the time Charlie learns Charlotte is ill and that the pranks were a way to distract Ms. Finch from Charlotte's illness, Charlotte's gravitational pull on him is too great to overcome. Soon he must choose between the familiar formulas he's always relied on, or the girl he's falling for (at far more than 32 feet per second).

Shannon Alexander was compelled to write this story after the death of her best friend to ovarian cancer. She is a member of SCBWI and She Writes, and works as a copy editor for Sucker Literary, a showcase for new and undiscovered writers of young adult literature. She recently completed her seventh Susan G. Komen 3-Day for the Cure in Washington D.C., and is an active supporter of cancer research. <http://wandthewords.blogspot.com>

Anomaly

Tonya Kuper

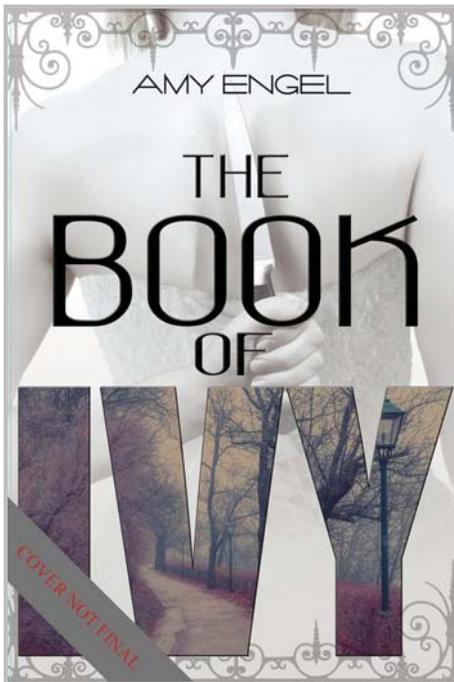

***The Matrix* meets *Divergent* in this fast-paced sci-fi novel from debut author Tonya Kuper.**

What if the world isn't what we think? What if reality is really only an illusion? What if you were one of the few who could control it?

Yeah, Josie Harper didn't believe it, either, until strange things started happening. When this hot guy tried to kidnap her, shouting about ultimate observers and pushing and consortiums hell-bent on controlling the world... Well, that's when things got real. Now Josie's got it bad for a boy who weakens her every time he's near and a world of enemies on her tail who want to control her gift, so yeah, she's going to need more than just her wits if she hopes to survive much longer.

Einstein never saw *this* coming...

The Book of Ivy

Amy Engel

***Hatfields & McCoys* meets *Matched*. A fascinating tale of deceit, family, forbidden love, and murder.**

In a future where girls no longer control their own fates, sixteen-year-old Ivy Westfall has the power to give girls back their choices. If she's willing to commit murder to do it.

After a brutal nuclear war, followed by famine and disease, the United States was left decimated. A small group of survivors eventually banded together, but only after more conflict over who would govern the new nation. Fifty years later, peace and control are maintained by marrying the daughters of the losing side to the sons of the winning group in a yearly ritual. This year, it is Ivy Westfall's turn to be married. Only her bridegroom is no average boy. He is Bishop Lattimer, the president's son. And Ivy's mission is not simply to marry him. Her mission, one she's been preparing for all her life, is to kill him and restore the Westfall family to power.

But Bishop Lattimer turns out not to be the cruel, heartless boy her family warned her to expect. And as Bishop and Ivy navigate a tentative friendship that evolves into something more, Ivy is torn between loyalty to her family and following her own heart. She is a teenage girl caught in an adult web of manipulation, lies, and the struggle for power. Ultimately, she must decide what sacrifices are worth making for the lives of those she loves.

Amy Engel has a B.A. in English from the University of Kansas and a J.D. from Georgetown University. She has been previously published by Dreamspinner Press ("Shades of Gray") under the pen name Brooke McKinley.
