Exile on Front Street
My Life as a Hells Angel . . . and Beyond
by George Christie

A memoir of the Hells Angels motorcycle club from one of its most high-profile leaders.

After forty years in the Hells Angels, George Christie was ready to retire. As president of the high-profile Ventura charter of the club, he had been the yin to Sonny Barger’s yang. Barger was the reckless figurehead and de facto world leader of the Hells Angels. Christie was the negotiator, the spokesman, the thinker, the guy who smoothed things out. He was the one who carried the Olympic torch and counted movie stars, artists, rock musicians, and police chief captains among his friends.

But leaving the Hells Angels isn’t easy, and within two weeks of retirement, he was told he was out bad” - blackballed by his fellow Angels, prohibited from wearing the club patch, and even told he should remove his Death Head tattoo.

Now Christie sets out to tell his story. Exile on Front Street is the tale of how a former Marine gave up a comfortable job with the Department of Defense and swore allegiance to the Hells Angels. In this revealing, hard-hitting memoir, he recounts his life as an outlaw biker with the world's most infamous motorcycle club.

"Christie articulately defends his outlaw code, which he adhered to at great personal cost. Although he resigned from the Angels in 2010, his past, as he engagingly writes, continues to haunt him." - Publishers Weekly

Giant
Elizabeth Taylor, Rock Hudson, James Dean, Edna Ferber, and the Making of a Legendary American Film
by Don Graham

A larger-than-life narrative of the making of the classic film, marking the rise of America as a superpower, the ascent of Hollywood celebrity, and the flowering of Texas culture as mythology. Featuring James Dean, Rock Hudson, and Elizabeth Taylor, Giant is an epic film of fame and materialism, based around the discovery of oil at Spindletop and the establishment of the King Ranch of south Texas. Isolating his star cast in the wilds of West Texas, director George Stevens brought together a volatile mix of egos, insecurities, sexual proclivities, and talent. Stevens knew he was overwhelmed with Hudson's promiscuity, Taylor's high diva-dom, and Dean's egotistical eccentricity. Yet he coaxed performances out of them that made cinematic history, winning Stevens the Academy Award for Best Director and garnering nine other nominations, including a nomination for Best Actor for James Dean, who died before the film was finished.

In this compelling and impeccably researched narrative history of the making of the film, Don Graham chronicles the stories of Stevens, whose trauma in World War II intensified his ambition to make films that would tell the story of America; Edna Ferber, a considerable literary celebrity, who meets her match in the imposing Robert Kleberg, proprietor of the vast King Ranch; and Glenn McCarthy, an American oil tycoon; and Errol Flynn lookalike with a taste for Hollywood. Drawing on archival sources Graham's Giant is a comprehensive depiction of the film's production showing readers how reality became fiction and fiction became cinema.

A noted authority on all things Texas, Graham turns his attention to film with this authoritative tale of 'Big Texas Oil' and the epic movie Giant (…)

A Novel
by Barbara Delinsky

From Barbara Delinsky, the New York Times bestselling author of Blueprints and Sweet Salt Air, a brand-new novel about a woman in hiding finding the courage to face the world again.

Mackenzie Cooper took her eyes off the road for just a moment but the resulting collision was enough to rob her not only of her beloved daughter but ultimately of her marriage, family, and friends - and thanks to the nonstop media coverage, even her privacy. Now she lives in Vermont under the name Maggie Reid, in a small house with her cats and dog. She's thankful for the new friends she's made - though she can't risk telling them too much. And she takes satisfaction in working as a makeup artist at the luxurious local spa, helping clients hide the visible outward signs of their weariness, illnesses, and injuries. Covering up scars is a skill she has mastered.

Her only goal is to stay under the radar and make it through her remaining probation. But she isn't the only one in this peaceful town with secrets. When a friend's teenage son is thrust into the national spotlight, accused of hacking a powerful man's Twitter account, Maggie is torn between pulling away and protecting herself - or stepping into the glare to be at their side. As the stunning truth behind their case is slowly revealed, Maggie's own carefully constructed story begins to unravel as well. She knows all too well that what we need from each other in this difficult world is comfort. But to provide it, sometimes we need to travel far outside our comfort zones.

Shelter in Place
by Nora Roberts

From Nora Roberts comes the #1 New York Times bestseller Shelter in Place - a powerful tale of heart, heroism and propulsive suspense.

It was a typical evening at a mall outside Portland, Maine. Three teenage friends waited for the movie to start. A boy flirted with the girl selling sunglasses. Mothers and children shopped together, and the manager at the video-game store tended to customers. Then the shooters arrived.

The chaos and carnage lasted only eight minutes before the killers were taken down. But for those who lived through it, the effects would last forever. In the years that followed, one would dedicate himself to a law enforcement career. Another would close herself off, trying to bury the memory of huddling in a ladies' room, helplessly clutching her cell phone - until she finally found a way to pour the emotions of that night into her art.

But one person wasn’t satisfied with the shockingly high death toll at the DownEast Mall. And as the survivors slowly heal, find shelter, and rebuild, they will discover that another conspirator is lying in wait - and this time, there might be nowhere safe to hide.

From the author of Year One and Come Sundown, Shelter in Place blends propulsive suspense, a cast of vivid characters, and intimate psychological insight in a rich, exciting read.

But as Hinton realized and accepted his fate, he resolved not only to survive, but find a way to live on Death Row. For the next twenty-seven years he was a beacon - transforming not only his own spirit, but those of his fellow inmates, fifty-four of whom were executed mere feet from his cell. In Rescued, David Rosenfelt again delights his readers with the charm and wit they've come to expect. Even the most fervent fans of the sardonic Andy Carpenter and his team will be enthralled by this latest case, where the stakes have never been higher.

Defense lawyer Andy Carpenter is reluctant to take on any more cases. He'd much rather spend his time working for his dog rescue organization, the Tara Foundation, than find himself back in a courtroom. However, when a truck carrying over seventy dogs from the South to the rescue-friendly northeast turns up with a murdered driver, Andy can't help but get involved.

Of course Andy is eager to help the dogs, many of whom come to the Tara Foundation while awaiting forever homes - it's the man accused of murder who he has a problem defending. The accused just happens to be his wife Laurie's ex-fiance; her tall, good looking, ex-Marine ex-fiance. Even though he acknowledges having argued with the victim, he swears that he is not a killer, and though he would rather not, Andy has to admit he believes he's telling the truth.

For Andy, even with dozens of successful cases behind him, this case that his wife insists he take may prove to be his most difficult.

Series fans will welcome this latest installment, and those unfamiliar with Andy and his crew will be delighted to have so much catching up to do." - Booklist

It's a beautiful summer day in Manhattan as excited tourists board the floating Air and Space Museum on the USS Intrepid. Back in Washington, the White House orders Op-Center disbanded - or so it seems. Unbeknownst to America's enemies, director Chase Williams has been put in charge of a brand-new, top-secret covert attack team known only as BLACK CAT. Its members, each chosen for their unique set of dangerous black-ops skills - martial arts expert Lieutenant Grace Lee, sharpshooter Lance Corporal Jaz Rivette, and JAG attorney Major Hamilton Breen - have been assigned to seek out Salehi and bring him to justice. Whatever it takes.

But Williams and his team soon discover Salehi is part of a new and even more frightening conspiracy, led by a renegade Iranian tycoon determined to become the next Osama bin Laden and establish a new Islamic State that will make ISIS seem like child's play. Another Kind of Madness
A Journey Through the Stigma and Hope of Mental Illness
by Stephen Hinshaw

Glenn Close says: *Another Kind of Madness* is one of the best books I've read about the cost of stigma and silence in a family touched by mental illness. I was profoundly moved by Stephen Hinshaw's story, written beautifully, from the inside-out. It's a masterpiece.

A deeply personal memoir calling for an end to the dark shaming of mental illness

Families are riddled with untold secrets. But Stephen Hinshaw never imagined that a profound secret was kept under lock and key for 18 years within his family - that his father's mysterious absences, for months at a time, resulted from serious mental illness and involuntary hospitalizations. From the moment his father revealed the truth, during Hinshaw's first spring break from college, he knew his life would change forever.

Hinshaw calls this revelation his "psychological birth." After years of experiencing the ups and downs of his father's illness without knowing it existed, Hinshaw began to piece together the silent, often terrifying history of his father's life - in great contrast to his father's presence and love during periods of wellness. This exploration led to larger discoveries about the family saga, to Hinshaw's correctly diagnosing his father with bipolar disorder, and to his full-fledged career as a clinical and developmental psychologist and professor.

In *Another Kind of Madness*, Hinshaw explores the burden of living in a family "loaded" with mental illness and debunks the stigma behind it. He explains that in today's (...)

How Hard Can It Be?
A Novel
by Allison Pearson

Look, I was doing OK. I got through the oil spill on the road that is turning forty. Lost a little control, but I drove into the skid just like the driving instructors tell you to and afterwards things were fine again, no, really, they were better than fine.

Kate Reddy had it all: a nice home, two adorable kids, a good husband. Then her kids became teenagers (read: monsters). Richard, her husband, quit his job, taking up bicycling and therapeutic counseling: drinking green potions, dressing head to toe in Lycra, and spending his time - and their money - on his own therapy. Since Richard no longer sees a regular income as part of the path to enlightenment, it's left to Kate to go back to work.

Companies aren't necessarily keen on hiring 49-year-old mothers, so Kate does what she must: knocks a few years off her age, hires a trainer, joins a Women Returners group, and prepares a new resume that has a shot at a literary prize for experimental fiction.

When Kate manages to secure a job at the very hedge fund she founded, she finds herself in an impossible juggling act: proving herself (again) at work, dealing with teen drama, and trying to look after increasingly frail parents as the clock keeps ticking toward her 50th birthday. Then, of course, an old flame shows up out of the blue, and Kate finds herself facing off with everyone from Russian mobsters to a literal stallion.

Surely it will all work out in the end. After all, how hard can it be?

How People and Machines Are Smarter Together
by Nick Polson and James Scott

Two leading data scientists offer an up-close and user-friendly look at artificial intelligence: what it is, how it works, where it came from, and how to harness its power for a better world.

A revolution of intelligent machines, from self-driving cars to smart digital assistants, is now remaking our world, just as the Industrial Revolution remade the world of the 19th century. AI is used to diagnose and treat cancer, detect fraud, save energy, and make new discoveries. AI is not some science-fiction droid from the future. It’s right here, right now, and it’s changing our lives at lightning-fast speed. Many of these changes offer great promise, including freedom from drudgery, safer workplaces, better health care, and fewer language barriers. But others elicit worry - whether about jobs, data privacy, or the prospect of machines making biased decisions with no accountability.

In AIQ, authors Nick Polson and James Scott, both experts in the field, show us how to make sense of these accelerating trends. This book is based on a simple premise: if you want to understand the modern world, you must learn about how these intelligent machines really work. AIQ will teach you how to speak the mathematical language of AI - but in an approachable manner, one anchored in storytelling rather than equations. Along the way, you will meet a fascinating cast of historical characters who have a lot to say about data, probability, and better thinking - and whose tried-and-true ideas are powering the AI revolution, as they play out in the modern age of big data.
