ISBN: 9780753473801

\$7.99 / \$11.50 Can.

From grasshoppers and rattlesnakes to lions and coyotes: this ingenious yet simple series introduces children to food chains and life cycles in three of the world's grasslands.

Discover which creatures are at the top and bottom of three grassland food chains, and learn what happens at each stage of their life cycle. At the end of each spread, use the picture clue to guess which grassland predator is waiting to pounce! Explore the African grasslands, the South American pampas, and the North American prairies to find out which creatures live there. . . and which will make a tasty snack!

Each book in this essential series reveals the life cycles of eleven fascinating living things in a particular habitat. The life cycles link together to create three food chains. At the end of the book is a simple overview of how the three food chains interact to create a food web. With clear text and punchy photographs, this is a captivating introduction to habitats and ecosystems.

Sean Callery is a writer and primary-school teacher. He has written a number of information books for publishers such as HarperCollins and Which?, as well as musicals and educational articles.

BASHER; MARY BUDZIK**Basher Geography: Countries of the World****An Atlas with Attitude****FEBRUARY**

Kingfisher

Juvenile Nonfiction / Reference / Atlases

On Sale 2/6/2018

Ages 10 to 14

Trade Paperback 200 pages

0.3 in H | 0.3 in W

Carton Quantity: 0

ISBN: 9780753473795

\$9.99 / \$13.99 Can.

Basher's unique atlas creates an unforgettable cast of characters that bring to life the world's countries and other territories.

This brand-new addition to the Basher range of books, which include the bestselling *Complete Periodic Table* from the *Basher Science* series, offers a unique and exciting way to explore the world. *Basher Geography: Countries of the World* features a different take on the traditional atlas approach and *will* capture the imagination of readers with its quirky and highly memorable characters to visualize the world's countries (and other key territories). You'll never forget the huge and fascinating country of Brazil envisaged as a footballer! Accompanying each country character is a detailed map as well as key facts and some amazing information. Who knew that over 820 different languages are spoken in Papua New Guinea, or that Peru has more pyramids than Egypt?

Mary Budzik is the author of many children's (and adult) books, including *Punctuation*, *Grammar* and *Creative Writing* in the *Basher Basics* series as well as the bestselling *Mythology* in the *Basher History* range.

From his first book *The Periodic Table* (2007) to his more recent, *Basher Science: Engineering*, Basher's unique illustration style of East meets West features a dash of graffiti artist and a large helping of wit added in. This "graphic surrealism" approach to illustration has intrigued and informed a whole generation of children and engaged them with learning important topics in a light-hearted and entertaining but informative manner.
